

Overnight SEO Writer log

Night: 19–20 Sep 2026 (London)
Ran: ~2:08 AM London (commit e199ac8 at 2026-09-20 01:08:57 UTC)
Repo: ali221345/colddirect-website
Branch: cursor/colddirect-seo-strategy-1d50
Status: Ran successfully. Not on main. No matching open pull request found. Not FTP-deployed.

Sources: commit e199ac8, logs/overnight-seo-404.log (crawl 2026-09-20T01:03:10Z), FIXED-LOG.md and seo_fixes.md from that commit.

Writer work is only on cursor/colddirect-seo-strategy-1d50. Live IIS will not pick up robots or 301-loop fixes until merge and FTP. origin/main later received the 6:09 AM London seo-bot sitemap job only.

Metric	Value
Service pages written	2
Sitemap URLs crawled	109
Sitemap 301 loops	3
Live noindex traps	1

Pages written (2-page cap)

When (London)	Page	Before → after	Class
~2:09 AM	supermarket-fridge-repair-london.html	708 words, noindex,nofollow → 1250 words, index,follow	GSC noindex trap
~2:09 AM	commercial-dishwasher-repair-london.html	166 words, no seo-article → 818 words + FAQ/Service schema	Weak service page

Folder index.html copies were kept in sync. Header, hero, CTA and footer otherwise unchanged.

Commit message: SE0: Add supermarket fridge repair London - GSC noindex-trap - tags: supermarket fridge, dishwasher - borough London

Classification used

URL	Class	Action
/cold-room-repair-london/	Winner	Left title/H1 alone (29 clicks, pos 5.4)
/fridge-repair-london/	Leak	Homepage exact-match link only; H1 locked until 28 Sep
/commercial-fridge-repair-london/	Opportunity	Already expanded — not rewritten

URL	Class	Action
/supermarket-fridge-repair-london/	Noindex trap	Live IIS had noindex,nofollow — unblocked in repo
/air-conditioning-repair-london/	Repo drift	Live already index; root + folder were still noindex
/commercial-dishwasher-repair-london/	Weak	Second page of the night (166 words)

GSC live API was unavailable in the agent (no gsc-key.json / GSC_CREDENTIALS_JSON). Keyword choice used seo-audit/daily-report-2026-09-19.md (window 12–18 Sep 2026).

Live sitemap crawl

109 URLs from https://www.colddirect.co.uk/sitemap.xml. Failures are IIS 301 loops (slash ↔ .html), not missing pages.

URL	Desktop	Mobile	Issue
/blog/commercial-fridge-repair-cost-london/	301	301	Slash → .html → slash (then homepage)
/contact/	301	301	Slash → .html → slash
/about-us/	301	301	Slash → .html → slash

Loop detail (HEAD, no follow):

- /about-us/ → 301 /about-us.html ; /about-us.html → 301 /about-us/
- /contact/ → 301 /contact.html ; /contact.html → 301 /contact/
- /blog/commercial-fridge-repair-cost-london/ → 301 .html ; .html → 301 /

Live site is Microsoft-IIS / PleskWin, not WordPress + nginx.

Repo fixes (pending FTP)

- web.config now serves folder index.html first and rewrites about-us, contact, and the blog-cost path (slash and .html) with stopProcessing="true" to break the IIS loop. WordPress/nginx rules were skipped.
- Money-page robots: supermarket fridge set to index, follow.
- Air-conditioning root HTML + folder synced to index, follow so a future FTP cannot re-noindex a live page.
- Homepage gained exact-match anchors: fridge repair london → /fridge-repair-london/, plus supermarket fridge and commercial dishwasher.

Queue after this night

Next weak service pages recorded in the commit notes:

1. multideck-fridge-repair-london.html
2. undercounter-fridge-repair-london.html

Other jobs (not this writer)

GitHub seo-bot daily seo 2026-09-20 ran at 05:09 UTC (6:09 AM London) on main (15cd0f2). That is a sitemap/report job, not the Overnight SEO Writer.

Writer work remains only on cursor/colddirect-seo-strategy-1d50 until merged and FTP-deployed.
